We will game drive the early hours of the morning through Lake Nakuru National Park, famed for lions and buffalo amongst a myriad of other game and visit Makalia Falls, where buffalo often come to drink. We will spend the whole day in this fabulous park, game and bird watching at will. Look out for those baboons! (BLD)

Zebra crossing the Mara river. It is perhaps the only region left in Kenya where the visitor may see animals in the same super-abundance as existed a century ago. Here we will use every opportunity to track the great migration as it crosses the Mara river back into Tanzania.

Against this magnificent backdrop roam vast herds of elephants which will stroll within easy camera-shot and you can feel the thrill of being in the wild, wild Africa accompanied by a kaleidoscope of other fabulous beasts - lion, buffalo, cheetah, giraffe, baboon, gazelle, hippo and wildebeest to name but a few. This is the largest non-flooded volcano crater in the world. Ngorongoro Lodge is perched on the rim of the Ngorongoro Crater at 7,500 feet above sea level (with a 2,000 feet sheer drop down to the crater floor), with spectacular and unsurpassed views over the crater's great bowl. The lounge features a fireplace and panoramic windows that give on to a terrace serving as an observation deck for the crater below. Often described as the world's eighth wonder, Ngorongoro offers the opportunity of viewing an amazing variety of wild animal life in a concentrated area with its unforgettable blue-tinted slopes, swampy grasslands, lakes, rivers, woodlands and hills. This veritable Garden of Eden is home to ostrich, wildebeest, zebra, buffalo, eland, hartebeest, warthog, long eared foxes, jackal, hyena, lion, cheetah, and the very rare black rhino, in all, some 30,000 animals inhabit the crater. During the night lions and hyenas often frequent the grounds, as well as baboons and elephants. For those that wish to take to the air, the famous Serengeti Balloon ride, departs at dawn (optional). For those that wish to view game by vehicle, first thing in the morning we will be game driving around the magnificent park, with zebra, wildebeest and gazelles all very close. If we are very lucky a pride of lion or a solitary leopard will put in an appearance. There is plenty of game to be seen on the vast savannah lands. Today we move toward Lobo Wildlife Lodge, game driving enroute. Lobo Wildlife Lodge is situated over the Serengeti Plains and has been constructed on a rocky outcrop with the swimming pool having been built on a rock deck. The viewing deck and pool overlook the wide open plains and a water hole - which encourages a variety of visitors during the day and night. At night the water hole is lit, attracting interesting nocturnal animals, leopard, lion, cheetah and hyena are often seen in close proximity. Wildebeest move through the northern woodlands in most years from June - December to feed on the longer grasses that persist in this area.
